

## DOI ON THE MOVE EMPOWERING PERSONNEL WITH ADVANCED MOBILE COMMUNICATIONS FROM GTSI

When DOI personnel are in the field, GTSI can deliver the advanced mobile computers that keep work flow and the flow of information moving. DOI can choose from two advanced mobile computers—the Toughbook® 51 Power GIS and the Toughbook® 18 Rugged Convertible Tablet.

### GTSI IDIQ ORDERING INFORMATION

Each Toughbook model can be ordered from the GTSI indefinite delivery/indefinite quantity (IDIQ) contract from an exclusive online portal:

- Toughbook 18 <http://www.gtsi.com/doi-tablets>
- Toughbook 51 <http://www.gtsi.com/doi-powergislaptops>

As a leading information technology product and solutions provider to Federal, State and Local Government, GTSI understands the scope of DOI's responsibilities. The Toughbook 18 and Toughbook 51 meet DOI's enterprise architecture and IT security guidelines, and they can be used in the outdoors, under extreme environmental conditions and at remote locations in addition to inside the office.

### TOUGHBOOK® 51 POWER GIS

Semi-rugged, full-featured desktop alternative

The Toughbook 51 is designed to support the rigorous demands of high-end graphic and GIS-related software. Equipped with a large 15-inch UXGA display, the Toughbook 51 is ideal for users of interactive, scientific or modeling applications as well as databases.

### TOUGHBOOK® 18 RUGGED CONVERTIBLE TABLET

Wireless notebook and handwriting-friendly tablet

The Toughbook 18 offers 500 Nit screen brightness that makes it ideal for outdoor use. Designed with configurations

**I Rely  
on GTSI**

that offer a choice of two operating systems, a CT-18 digitized tablet without serial port or a CF-18 touch table with serial port, the Toughbook 18 lets users take handwritten notes, mark and edit documents and draw diagrams. It can then convert handwriting to printed text.
