

FAA SAVES ON INFORMATION TECHNOLOGY AND NETWORKING PRODUCTS AND SERVICES.

The Strategic Sourcing for the Acquisition of Various Equipment and Supplies (SAVES) program is a vital element in the FAA's strategy to conform, comply, consolidate, construct and communicate. The contracts within the SAVES program are mandatory per the AMS Strategy Sourcing Policy 3.8.6. Under the IT Hardware contract, GTSI is the exclusive strategic sourcing vendor for Sun, Cisco and other IT peripherals and networking equipment. Through our collaboration, GTSI will help FAA staff comply with the SAVES program's mandates for cost efficiency and cost effectiveness.

The IT and networking products and services provided by GTSI help the FAA standardize on technology, maintain security, reduce infrastructure operations budgets and become more customer-focused. In addition, asset tags are automatically applied to qualifying hardware under the contract.

EASY ORDERING VIA [GTSI.COM/FAASAVES](https://gtsi.com/faasaves)

A specifically designed portal—[GTSI.com/FAASAVES](https://gtsi.com/faasaves)—makes it easy for FAA staff to purchase the following products:

- Sun enterprise and Linux servers
- Sun storage
- Cisco routers and switches
- Cisco VoIP and wireless hardware and software components
- Peripheral equipment such as cables, memory and power supplies

Through this portal, FAA staff can search for and view all the products and prices listed on the GTSI FAA SAVES contract. Orders are placed by creating a shopping cart, which can be emailed to purchase approvers and/or buyers. In addition, FAA buyers can create a web account through which they can receive shopping carts and make purchases.

Many of the products on [GTSI.com/FAASAVES](https://gtsi.com/faasaves) meet the FAA's standard specified configuration requirements, as compiled by the Technology Standards Team and approved by the Chief Information Officer Council (CIOC).

I Rely
on GTSI

THE TECHNOLOGY PARTNER FOR TODAY'S GOVERNMENT AGENCIES

For over 20 years, GTSI has been the trusted guide for federal, state and local government customers in understanding, buying, deploying and using today's infrastructure technologies. Service professionals, IT leaders and procurement specialists consistently stake their trust in the technology solutions, certified experts and comprehensive support we provide.

From staff technologists and interoperability labs to contract vehicles, integration expertise, financing and professional services and logistics management, GTSI has what public agencies need to meet today's sophisticated acquisition requirements. At the same time, GTSI has the inside track to the infrastructure technology that truly moves the dial and assures that the best solutions are built with the best products from technology's key innovators.
