

GSA Networkx Contract

The Networkx Universal and Enterprise contracts are GSA procurement vehicles for a comprehensive suite of IT services. Open to all Federal agencies, Networkx contracts promote government-wide enterprise architecture initiatives and provide a framework to support cross-agency collaboration, transformation, and technology improvement.

Networkx Universal and Networkx Enterprise serve as a primary replacement for the expiring FTS2001 and FTS2001 Crossover contracts.

The GTSI value

GTSI is a solutions provider offering a Technology Lifecycle Management (TLM) approach to IT infrastructure solutions delivered through vendor-neutral, industry-leading professional and financial services. GTSI employs a proactive, strategic methodology that streamlines TLM, from initial assessment to acquisition, implementation, refresh, and disposal. The TLM methodology enables GTSI to implement solutions for government agencies quickly and cost-effectively.

GTSI brings a full range of professional and financial services that help agencies align their acquisition strategy with business and technology goals.

Enterprise-wide solutions through certified project managers and engineers using Earned Value Management standards and proven processes enable agencies to realize the full benefit of their IT infrastructures.

Government-wide impact of Networx

Networx enables Federal agencies to quickly and easily procure cost-effective, scalable technologies for secure global communications.

Through Networx, government agencies have the same access to technologies, services, and consultants that have primarily been available only to the private sector.

Working with GTSI for procurements under Networx, agencies are provided with:

- Greater flexibility
- Higher security
- More services
- Streamlined operations
- Enhanced performance, reliability, and restoration
- Full support for IPv6 transition
