

Project Management

Government IT initiatives benefit from GTSI's Project Management services through:

- **Better visibility into project health, resource allocation, and finances**
- **Increased control by enforcing processes**
- **Greater flexibility to adapt to change**
- **Enhanced collaboration and communication**

To accommodate the growing need for multitalented specialists within government IT departments, GTSI provides experienced project managers to complement agency staff on a project or program-level basis.

A recent Society of Information Management (SIM) study of CIO's confirms project management tops the list of most desired skills by IT departments. GTSI's Project Managers have proven experience in yielding superior quality control, improved efficiencies, and bringing discipline to agency initiatives.

An integrated approach to resource, time, and cost management combined with an in-depth understanding of the project's technology roadmap are key enablers of success. GTSI's Project Management team consists of Project Management Institute (PMI) certified professionals who consistently exceed the Office of Management and Budget's expectation of managing and measuring projects to within 10 percent of baseline goals and complete government IT projects on time, within scope, and on budget.

Ensuring Success through GTSI's Project Management Approach

GTSI's Project Managers employ Earned Value Management (EVM), an industry best practice, which

proactively measures accomplishment of work and schedule and cost performance within a single integrated methodology. GTSI's PMI-certified professionals combine EVM standards and techniques with the following proven project management methodology:

- **Initiate** – Define clear objectives, scope, and deliverables
- **Plan** – Determine timeline and budget, allocate resources, and identify risks
- **Execute** – Perform work and coordinate tasks
- **Monitor and Control** – Ensure objectives are met, report performance, control quality, and mitigate risk
- **Close** – Receive customer approval and deliver project report, including lessons learned

GTSI's Project Management services ensure success for government's mission-critical requirements, through its proven project management methodology, blended with engineering expertise and its Technology Lifecycle Management approach.

Addressing the need for visibility and collaboration

GTSI's OneView provides a secure, web-based dashboard and detailed reporting that provides stakeholders real-time information of project status.

Leveraging Technology with Professional and Financial Services

Careful planning and project management, along with proven processes enable GTSI to complete agencies' IT projects on time, within scope, and on budget.
