Contract # 4400006645

Labor Categories & Rates

Labor Category	Functional Description	Education	Experience	Hourly Rate Effective 5/30/2019
Cloud Architect	Responsible for designing and implementing enterprise infrastructure and platforms required for cloud computing. Analyzes system requirements and ensures that systems will be securely integrated with current applications. Has a deep understanding of system development in cloud environments, including Software as Service (SaaS), Platform as Service (PaaS), or Infrastructure as a Service (IaaS). Relies on extensive experience and judgment to plan and accomplish goals. Performs a variety of tasks. Leads and directs the work of others. A wide degree of creativity and latitude is expected. Typically reports to a manager or head of a unit/department.	BA/BS in area of specialty	6-8 years of experience in the field or in a related area	\$175.48
Communications Engineer I	Researches, develops, designs, and evaluates communications systems and equipment. Studies communications systems and equipment, such as present and projected volume of communications, effectiveness and adequacy of system, and estimated equipment costs. Performs engineering studies to obtain data on new equipment and systems developments in communications field and adaptability of equipment to existing system.	BA/BS in area of specialty	1-3 years of experience in the field or in a related area	\$114.79
Communications Engineer II	Researches, develops, designs, and evaluates communications systems and equipment. Studies communications systems and equipment, such as present and projected volume of communications, effectiveness and adequacy of system, and estimated equipment costs. Performs engineering studies to obtain data on new equipment and systems developments in communications field and adaptability of equipment to existing system.	BA/BS in area of specialty	4-6 years of experience in the field or in a related area	\$130.23
Communications Engineer III	Researches, develops, designs, and evaluates communications systems and equipment. Studies communications systems and equipment, such as present and projected volume of communications, effectiveness and adequacy of system, and estimated equipment costs. Performs engineering studies to obtain data on new equipment and systems developments in communications field and adaptability of equipment to existing system.	BA/BS in area of specialty	7-9 years of experience in the field or in a related area	\$143.91
Communications Engineer IV	Researches, develops, designs, and evaluates communications systems and equipment. Studies communications systems and equipment, such as present and projected volume of communications, effectiveness and adequacy of system, and estimated equipment costs. Performs engineering studies to obtain data on new equipment and systems developments in communications field and adaptability of equipment to existing system.	BA/BS in area of specialty	at least 10 years of experience in the field or in a related area	\$151.71
